Food Rev. Int., 12(4), 531 (1996)

AUTHOR INDEX TO VOLUME 12

C

Chandarana, D. I. (book review), 280
Coulibaly, K., 131–151

F

Fox, P. F., 457–509

G

Gendel, S. M. (book review), 525–526
Göktürk, A., 437–455

H

Hasegawa, S., 413–435
Hatanaka, A., 303–350
Hicks, P. A., 71–103
Ho, C.-T., 351–373

I

Ilori, M. O., 251–270, 511–523
Irefin, I. A., 251–270, 511–523

J

Jeon, I. J., 131–151
Juliano, B. O., 71–103

K

Karaalı, A., 437–455
Karwoski, M., 155–174

L

Laakso, P., 199–250

M

McSweeney, P. L. H., 457–509
Maga, J. A., 105–130; (book review), 279
Makinwa, E. O., 511–523
Miyake, M., 413–435

N

Nelson, P. E., 375–401

R

Riha, W. E., III, 351–373

S

Shahidi, F., 175–197, 283–302
Simopoulos, A. P., 273–277, 403–408
Singh, R. K., 375–401
Synowiecki, J., 283–302

T

Tahvonen, R., 1–70
Thakur, B. R., 375–401

V

Venugopal, V., 175–197

Food Rev. Int., 12(4), 533–534 (1996)

SUBJECT INDEX TO VOLUME 12

A

Agriculture and agroindustries, in Turkey, 437–455
Alcoholic beverages, oak lactones in, 105–130
Automated direct and indirect methods in food microbiology, a literature review of, 155–174

B

Brewing industry, in Nigeria, indigenous technological capability development in, 511–523

C

Cadmium, contents in foods and diets, 1–70
Cheese, proteolysis in during ripening, 457–509
Chemical residues, solid-phase extraction of, 131–151
Citrus limonoids, biochemistry and biological functions of, 413–435

D

Direct methods, automated, literature review of in food microbiology, 155–174

E

Encapsulation and controlled release of food ingredients (book review), 279
Exercise, relation to genetics and nutrition, 403–408
Extrusion cooking, formation of flavors during, 351–373

F

Fish muscle, structure and composition of, 175–197
Flavor
  compounds, solid-phase extraction of, 131–151
  formation of during extrusion cooking, 351–373
Food microbiology, literature review of automated direct and indirect methods in, 155–174
Food process design and evaluation (book review), 280
Food standardization policies, in Nigeria, 251–270
Functional properties, of rice, 71–103

G

Genetic variation, and nutrition, 273–277
Genetically modified foods (book review), 525–526
Genetics, relation to nutrition and exercise, 403–408

Green odor, fresh, emitted by plants, 303–350

I

Indigenous technological capability development, in the brewing industry in Nigeria, 511–523
Indirect methods, automated, literature review of in food microbiology, 155–174

L

Lactones, oak, in alcoholic beverages, 105–130
Lead, contents in foods and diets, 1–70
Limonoids, citrus, biochemistry and biological functions of, 413–435

M

Muscle
  fish, structure and composition of, 175–197
  seal meat, as a source of food for health and nutrition, 283–302

N

Natural mixtures, approaching the molecular composition by analysis of triacylglycerols, 199–250
Nigeria
  food standardization policies in, 251–270
  indigenous technological capability development in the brewing industry in, 511–523
Nutrition
  and genetic variation, 273–277
  relation to genetics and exercise, 403–408
Nutrition tid-bites, introduction to, 271

O

Oak lactones, in alcoholic beverages, 105–130

P

Plants, fresh green odor emitted by, 303–350
Proteolysis, in cheese during ripening, 457–509

Q

Quality, of processed tomato products, 375–401

R

Rice, functional properties of and rice food products, 71–103
Ripening, proteolysis in cheese during, 457–509

S

Seal meat, as a source of muscle food for health and nutrition, 283–302
Solid-phase extraction, of food flavor compounds and chemical residues, 131–151

T

Tomato products, processed, quality attributes of, 375–401
Triacylglycerols, analysis of, 199–250
Turkey, agriculture and agroindustries in, 437–455
